Introducing the Professional Qualification

This 3-day PRINCE2 Foundation course (based on PRINCE2:2009) provides an optimal mix of classroom lectures, interactive case studies, assignments, additional reading materials, and exam preparation material. Participants in this course will enjoy learning about the PRINCE2 methodology, and will concurrently learn the skills needed to practically apply this knowledge in real life

The purpose of the Foundation qualification is to confirm that a candidate has sufficient knowledge and understanding of the PRINCE2 method to be able to work effectively with, or as a member of, a project management team working within an environment supporting PRINCE2.

Learning Objectives:
At the end of this course, you will be able to:
• The principles of the PRINCE2 Project Management method
• How to start, control, and close projects
• How to manage quality
• How to manage risk
• How to deliver projects on time, within budget, and to the specified business case
• How to tailor PRINCE2 to different project environments

Learning Resources:
SMCE offers it's learners a range of premium accredited learning resources. The list shown below is a reference list for the Training Providers in their consideration for supplemental material:

PMCFND03	Business Case
PMCFND04	Organization
PMCFND05	Quality
PMCFND06	Plans
PMCFND07	Risk
PMCFND08	Mock exam

What is PRINCE2?

PRINCE2 is a non-proprietary method used extensively in more than 150 countries around the world, and its take-up grows daily. It is widely considered as the leading method in project management, with in excess of 20,000 organizations already benefiting from its pioneering and trusted approach. This is largely due to the fact that PRINCE2 is truly generic: it can be applied to any project regardless of scale, type, organization, geography or culture.

PRINCE2 comprises a set of principles, a set of control themes, a process lifecycle and guidance on matching the method to the project's environment.

PRINCE2 provides a process model for managing a project. This consists of a set of activities that are required to direct, manage and deliver a project.

Benefits of PRINCE2

PRINCE2 provides the following benefits:
- PRINCE2 can be applied to any type of project
- It provides a common vocabulary and approach
- PRINCE2 integrates easily with industry-specific models
- The product focus clarifies for all parties what the project will deliver to agreed quality standards
- PRINCE2 applies 'management by exception' providing efficient use of senior management time
- It ensures a focus on the continuing viability of the project
- There are scores of accredited training and consultancy organizations operating worldwide, which can supply expert support for PRINCE2 projects or for organizations planning to adopt PRINCE2
- It provides explicit definitions of roles and responsibilities so that everyone understands what is expected of them and what to expect of others.

Contact SMCE www.smce.org

The Service Management Center of Excellence - SMCE is a regional organization dedicated to the promotion of a culture of Service Excellence in public and private sectors. To achieve its stated goals, SMCE has aligned with leading local and international authorities in order to accelerate knowledge transfer and build local expertise in the area of Service Management.

The center is devoted to the development of the strategies, techniques, principles and practices of excellence that will enhance individual and organizational performance, and further the advancement and maturity of IT industry in the region.
